Auto-transfer

How to link:

When Switch on the lights in the zone you want to link, press zone-on button within 3 seconds, the link is done when the lights blink 3 times. The link-signal will be auto-transferred to another.

Notice:

1. In the same zone. Each light only auto-transfers and response to the different signal received last time in the same zone.

2. Auto-transfer can happen among different groups, the lights receive the signal from the lights in the different zones, only transfer the signal, don't response.

How to unlink:

When Switch on the lights in the zone you want to unlink, press zone-on button 5 times within 3 seconds, the unlink is done when the lights blink 6 times. The unlink-signal will be auto-transferred to another.

Auto-sync

Each light can transmit the signal after the specific time and auto-transfer.

Saturation control—White and RGB CO-exist

When you long press the all-off button,the light will enter into this mode.

White and RGB light work together, reaching the highest brightness,power is around 50-55W.

Under this mode, you can choose any color through the color ring,and adjust the brightness of white, through the slider.

Press All-on button for one second to exit from this mode.

Beam angle: 25° 60° 120° optional with different lens. (120° is without lens)
